RE: Support for LB 768 – Redefine economic development program to include early childhood infrastructure development for cities of the first and second class and villages

Dear Chairman Wayne and Members of the Urban Affairs Committee,

Children are our state’s greatest resource, and we all benefit when every child has the opportunity to reach their full potential in life. Voices for Children in Nebraska supports LB 768 because it would strengthen our investments in tomorrow’s workforce.

Early childhood development research is clear: interventions that start as early as birth show remarkably high returns for each dollar spent. The cognitive and character-building tools provided by early childhood education have even been shown to overcome poor outcomes that are otherwise demonstrated among children in at-risk circumstances.ⁱ

Access to affordable and quality early childhood programs is not just a sound investment in Nebraska’s future—it also supports today’s workforce by allowing more parents to work knowing that their young children are safe and cared for. Significant barriers remain for many Nebraska parents, particularly for families in rural Nebraska. A recent poll showed that many Nebraska parents living in rural and isolated areas were very concerned about shortages in quality child care programs.ⁱⁱ Indeed, 11 Nebraska counties had no licensed child care facilities in 2015, while many more were operating near or over capacity.ⁱⁱⁱ

By allowing economic development programs to include early childhood infrastructure, LB 768 would expand much-needed access to high quality early childhood programs, and allow more communities to make smart investments in their children. We thank Senator Quick for bringing this important issue forward and respectfully urge the committee to advance the bill.

Sincerely,

A handwritten signature in black ink, appearing to read "Julia Tse", written in a cursive style.
